

USER HINTS

- 1) FOCUS YOUR EYES ON THE NEAREST HALF OF THE MIRROR... YOUR PERIPHERAL VISION WILL AUTOMATICALLY SEE TO THE OUTER PORTION OF THE MIRROR**

- 2) AS WITH ANY CAR MIRROR, USE SEVERAL GLANCES TO MONITOR YOUR SURROUNDINGS. NEVER STARE INTO YOUR MIRRORS.**

- 3) YOUR MULTIVEX MIRRORS OPERATE DIFFERENTLY FROM STANDARD MIRRORS. OBJECTS SEEN IN THE FARTHEST THIRD OF THE MIRROR ARE IN A HAZARDOUS ZONE!! OBJECTS IN THE NEAREST HALF OF THE MIRROR ARE TOO FAR BEHIND YOUR VEHICLE TO POSE A HAZARD. OBJECTS IN THE MIDDLE THIRD ARE IN A TRANSITION ZONE.**

- 4) TAKE AS MUCH TIME AND PRACTICE AS IS NECESSARY TO BECOME FAMILIAR AND COMFORTABLE WITH THE OPERATION OF YOUR NEW MULTIVEX MIRRORS!!**
